

Amendments to the Claims:

A listing of the entire set of pending claims (including amendments to the claims, if any) is submitted herewith per 37 CFR 1.121. This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-5 (Canceled)

6. (Previously presented) A phenylethanol derivative, characterized in that the phenylethanol derivative comprises at least one photo-convertible group suitable for adjusting the helical twisting power of the phenylethanol derivative, wherein the phenylethanol has the formula

wherein

A stands for a bond or a p-phenylene group;

B and B' are independently $(O)_p-C_6H_{2o}-O-CO-CR'=CH_2$, o being 2-12, p being 0 or 1, and R' being H or CH_3 ;

P stands for a CH_2 or a $C=O$ group;

Q and Q' are independently selected from H, C1-C3 alkyl, C1-C3 alkoxy, halogen, and CN;

n is an integer from 1 to 3; and

m is an integer from 0 to 2.

7. (Previously presented) A phenylethanedil derivative, characterized in that the phenylethanedil derivative comprises at least one photo-convertible group suitable for adjusting the helical twisting power of the phenylethanedil derivative, wherein the phenylethanedil has the formula

wherein

A stands for a bond or a p-phenylene group;

B is $(O)_p-C_6H_{2o}-O-CO-CR'=CH_2$, o being 2-12, p is 1, and R' being H or CH_3 ;

P stands for a CH_2 or a $C=O$ group;

Q is selected from H, C1-C3 alkyl, C1-C3 alkoxy, halogen, and CN; and

m is an integer from 0 to 2.

8. (Previously presented) A method for the preparation of the phenylethanediol derivative of claim 6 by the steps of a) synthesizing a 2-hydroxy ether-protected phenylethanediol, b) followed by etherification or esterification of the 1-hydroxy group of the 2-hydroxy ether-protected phenylethanediol with an alcohol (or derivative thereof) or acid, respectively, optionally comprising polymerizable and/or photo-convertible groups, c) then cleaving the ether-protective group to obtain a phenylethanediol derivative with a free 2-hydroxy group, and optionally d) esterification of the free 2-hydroxy group with an acid which optionally comprises one or more polymerizable and/or photo-convertible groups.

9. (Previously presented) A cholesteric composition comprising the phenylethanediol derivative of claim 6.

10. (Previously presented) An optical element comprising the phenylethanediol derivative of claim 6.

11. (Previously presented) An optical color filter comprising the phenylethanediol derivative of claim 6.

12 (Canceled)

13. (Previously presented) A cholesteric composition comprising the phenylethanediol derivative of claim 7.

14. (Previously presented) An optical element comprising the phenylethanediol derivative of claim 7.

15. (Previously presented) An optical color filter comprising the phenylethanediol derivative of claim 7.
